DATA CLEANSING

It is the process of identifying if your contact data is still correct or valid

EMAIL APPEND & VERIFICATION

Email appending is a practice that involves taking known customer data (first name, last name, and postal address) and matching it against a vendor's database to obtain email addresses.

PHONE VERIFICATION

Phone verification is a service in data enrichment. It is defined as merging third-party data from an external authoritative source with an existing database of first-party customer data.
